

**CLAIMS:**

1. A deck mop comprising:
  - a. an elongated handle;
  - b. a unitary mop body and a plurality of absorbent material strands attached to and extending from the mop body, said mop body comprising receiving means to accept and secure the handle to the mop body, the mop body further comprising front and rear walls separated by and connected to an intervening top wall which extends between the front and rear walls, said top wall supporting the receiving means;
  - c. scrubber means for cleaning ingrained, soiled surfaces, said scrubber means having an abrasive surface; and
  - d. support means extending between the front wall and the scrubber means for maintaining the abrasive surface of the scrubber means in a downwardly facing, stationary position in relation to the mop body.
2. The swab mop as in claim 1 in which the front and rear walls are parallelly aligned.
3. The swab mop as in claim 1 in which the abrasive surface is positioned at an oblique angle to the front wall to which it is maintained.
4. The swab mop as in claim 1 wherein the abrasive surface comprises an abrasive pad.
